

Greenline Calf

To promote health, intakes and growth of young calves

Greenline Calf is a special combination of minerals, yeasts, specific sugars, and additives included in calf starter and calf rearer concentrate feeds to meet the specific mineral and vitamin requirements of the young calf.

Greenline Calf stimulates rumen development and the immunity status & gut protection of the calf while aiding in feed digestion and minimising the risk of digestive upsets.

Greenline Calf also includes a special 'Mother smell' stimulant that attracts the calf to the feed, promotes intakes and encourages papillae growth.

Features:

- Specific organic acids,
- High levels of vitamins and trace elements
- 'Mother smell'
- Yeast
- Extracts of locust bean and chicory

Benefits:

1. Stimulates rumen development
2. Aids early development of the immune system
3. Attracts young to concentrate feed
4. Reduces lactic acid accumulation, helping to reduce the incidence of bloat
5. Develops rumen papillae, increasing absorptive capacity of the rumen
6. Encourages increased intake
